ASK US ABOUT

A live walkthrough with your own bookings

One system to book, price, invoice, and track every shipment.

Built for cargo & freight teams

Purpose-built for cargo booking agents, freight forwarders, and logistics operators handling multiple customers and destinations.

Set up per company

Each client gets its own branded booking link, pricing rules, and dashboard — fully separated from every other tenant.

Live from booking to delivery

Every shipment is visible end to end, with automatic customer emails at each step.

CargoFlow

Cargo booking and invoicing, without the chaos.

 **BOOKED**

 **IN TRANSIT**

 **DELIVERED**

HOW IT WORKS

From a booking link to a signed, delivered invoice.

Customers book themselves through a branded intake form. Your team takes it from there — no spreadsheets, no manual re-typing.

1 Customer books online

Contact details, cargo items, weight, and destination — submitted with a digital signature.

2 Pricing & invoice, automatically

Rates apply instantly by cargo type and destination zone. A professional signed PDF invoice goes out by email.

3 Tracked through to delivery

Status moves through Booked → In Transit → Delivered, with timestamps and an automatic delivery notice to the customer.

WHAT'S INCLUDED

Everything a cargo desk needs — nothing it doesn't.

Branded online booking

A dedicated intake link per client, multi-item bookings, weight confirmation, and signature capture.

Flexible pricing engine

Flat, Zone, or Hybrid pricing across four destination zones — South Asia, Middle East, East Asia, and Western.

Signed PDF invoices

Two-column invoices with company details, itemized cargo, and an embedded customer signature.

Shipment tracking

A visual timeline per booking, with enforced status order and automatic delivery emails.

Reporting, on demand

One-click export of bookings, pricing, and status to Excel for accounting and review.

READY WHEN YOU ARE

MULTI-TENANT · SCALES WITH YOU

See it running on a real booking.

CargoFlow is a complete, working platform — not a prototype. It's ready to be configured for your company, with your own branding, pricing, and booking link.

Ask about a live walkthrough

We'll book a sample shipment, generate an invoice, and move it through delivery — live, in front of you.
